## V DPM

For DPM explanation and application in the context of reporting please see [EIOPA DPM Documentation](#).

DPM is defined in two workbooks:

- [EIOPA DPM Dictionary 2.4.0 PWD](#) Including Solvency 2 and Pension Funds elements
- [EIOPA SolvencyII DPM Annotated Templates 2.4.0 PWD](#)

The most significant changes comparing to the previous version are described in “Versioning” worksheet in both DPM Dictionary and Annotated Templates files, however there are also detailed change logs for [the 2.4.0 PWD and 2.3.0 hotfix](#).

The 2.4.0 PWD DPM was enriched with a number of technical solutions aiming at solving typical Solvency II change management issues, e.g. changes to the ISO list of currencies and countries after the publication of the reporting package. Additionally, during the development of 2.4.0 PWD DPM materials some doubts were identified regarding the DRAFT version of LOGs. All of such cases were reported to EIOPA subject matter experts, discussed with them and later implemented in the DPM materials. As a result, the list of discrepancies between the consulted version of the ITS amendments and the actual 2.4.0 PWD DPM materials can be summarised as follows:

- Incorporation of additional technical fields in the Basic information templates to be used based on a direct EIOPA request (e.g. in case of wrongly identified identical data points);
- Introduction of artificial domain members in the GA domain necessary in case new ISO code for a country would be published after the 2.4.0 package release;
- Introduction of artificial domain members in the CU domain necessary in case new ISO code for a currency would be published after the 2.4.0 package release;
- Introduction of domain members in the GA domain necessary to be applied in the Brexit scenario;
- An updated list of ECAIs, to be in line with 18 March 2019 version of list provided on ESMA website, and minor corrections for additional dropdown options, e.g. other ECAI, multiple ECAIs;
- Division of “Calculation of loss absorbing capacity of deferred taxes” table present in S.25.01, S.25.02 and S.25.03 templates into two new separate tables, due to methodological constrains;
- Recodification of some rows (and improvement to labels) in S/SR.26.01 templates in order to properly reflect the required data content;
- Introduction of one new row (R0461) - Republic of Hungary that was missing in S/SR.27.01 templates (for “Natural Catastrophe risk – Windstorm” tables);
- Minor update in numeration for dropdown options in template S26.02 (R0010) Simplifications for counterparty default risk.
